Speech pathology services table of costs

Who can provide speech pathology services to injured workers?

All speech pathology services performed must be provided by a speech pathologist who has a current registration with the Queensland Registration Board. For services provided to workers outside Queensland, the treating speech pathologist must be eligible for registration in Queensland.

Service conditions

Services provided to injured workers are subject to the following conditions:

- **Referral** – all workers must have a current workers' compensation certificate signed by a medical practitioner or nurse practitioner to cover any speech pathology services provided.
- **Assessment** – after the initial consultation a completed *Provider management plan* must be provided to the insurer to advise of assessment outcome.
- **Provider management plan** – this form is available on the Q-COMP website (www.qcomp.com.au) and is to be completed if treatment is required after any pre-approved sessions or any services where prior approval is required. An insurer may require the *Provider management plan* to be provided either verbally or in written format. (Check with each insurer as to their individual requirements). The insurer will not pay for the preparation or completion of a *Provider management plan*.
- **Approval for other services or sessions** – approval must be obtained for any service requiring prior approval from the insurer before commencing treatment.
- **Payment of treatment** – all fees payable are listed in the *Speech pathology services table of costs*. For services not outlined in the table of costs, prior approval from the insurer is required.
- **Treatment period** – treatment will be deemed to have ended if there is no treatment for a period of two (2) calendar months. After this a *Provider management plan* needs to be submitted for further treatment to be provided. (The worker must also obtain another referral).
- **End of treatment** – all payment for treatment ends where there is either no further medical certification, the presenting condition has been resolved, the insurer finalises/ceases the claim, the worker is not complying with treatment or the worker has achieved maximum function.
- **Change of provider** – the insurer will pay for another initial consultation by a new provider if the worker has changed providers (not within the same practice). The new provider will be required to submit a *Provider management plan* for further treatment outlining the number of sessions the worker has received previously.

Treatment standards and expectations

When treating a worker with a compensable injury, the practitioner should, where appropriate:

- deliver outcome-focused and goal-orientated services, which are focused on achieving maximum function and safely returning the worker to work
- consider biopsychosocial factors that may influence the injured workers' return to work
- advise and liaise with the relevant treating practitioners and insurer
- keep detailed, appropriate, up-to-date treatment records and any relevant information obtained in the service delivery
- ensure that the worker has given their written authority prior to the exchange of information with third parties other than the referrer
- be accountable for the services provided, ensuring those services incurred for the compensable injury are reasonable
- maintain practice competencies relevant to the practitioner's profession and the delivery of services within the Queensland workers' compensation environment.

Note: long-term maintenance therapy is generally not supported unless sustained improvement in function can be demonstrated.

Payment for services

The worker's compensation claim must have been accepted by the insurer for the injury or condition being treated. If the application for compensation is pending or has been rejected, the responsibility for payment for any services provided is a matter between the practitioner and the worker (or the employer, where services have been requested by a Rehabilitation and Return to Work Coordinator).

Speech pathology services table of costs

All invoices should be sent to the relevant insurer for payment—check whether the worker is employed by a self-insured employer or an employer insured by WorkCover Queensland.

Identify the appropriate item in the *Speech pathology services table of costs* for services or treatment provided. The insurer will only consider payment for services or treatments for the compensable injury, not other pre-existing conditions. Insurers will **not** pay for general communication such as receiving and reviewing referrals.

All hourly rates are to be charged at pro-rata where applicable eg. for a 15min consultation/service charge one quarter of the hourly rate. All invoices must include the time taken for the service as well as the fee.

Fees listed in the *Speech pathology services table of costs* do not include GST. The practitioner is responsible for incorporating any applicable GST on taxable services/supplies into the invoice. Refer to a taxation advisor or the Australian Taxation Office for assistance if required.

Self-insurers require separate tax invoices for services to individual workers. WorkCover Queensland will accept billing for more than one worker on a single invoice.

Accounts for treatment must be sent to the insurer promptly, and within two (2) months after the treatment is completed. To ensure payment, the invoice must contain the following information:

- the words 'Tax Invoice' stated prominently
- practice details and Australian Business Number (ABN)
- invoice date
- worker's name, residential address and date of birth
- worker's claim number (if known)
- worker's employer name and place of business
- referring medical practitioner's or nurse practitioner's name
- date of each service
- item number/s and treatment cost
- a brief description of each service item supplied, including areas treated
- name of the practitioner who provided the service.

Item number descriptions and conditions

Consultations

Item number	Descriptor
700051	Initial consultation First consultation with worker
700053	Subsequent consultation Standard treatment consultation Prior approval is required by the insurer

For an accepted claim, the insurer will pay the cost of an initial consultation and report when it has been requested by the treating medical practitioner or an accredited workplace/employer. The insurer will not pay for an initial and subsequent consultation on the same day unless in exceptional circumstances, as approved by the insurer.

Consultations may include the following elements:

- **Subjective (history) reporting** – consider major symptoms and lifestyle dysfunction; current/past history and treatment; pain; aggravating and relieving factors; general health; medication; risk factors and key functional requirements of the worker's job.

Speech pathology services table of costs

- **Objective (physical) assessment** – use appropriate procedures and tests to assess communication—including speech, writing, reading, signs, symbols and gestures—and/or difficulties swallowing food and drink.
- **Assessment results (prognosis formulation)** – provide a provisional prognosis for treatment, limitations to function and progress for return to work.
- **Reassessment (subjective and objective)** – evaluate the progress of the worker using outcome measures for relevant, reliable and sensitive assessment. Compare against the baseline measures and treatment goals. Identify factors compromising treatment outcomes.
- **Treatment (intervention)** – formulate and discuss treatment goals, progress and expected outcomes with the worker. Advise on home/workplace care, including any exercise programs to be followed.
- **Clinical records** – record information in the worker’s clinical records, including the purpose and results of procedures and tests.
- **Communication (with the referrer)** – communicate any relevant information for the worker’s rehabilitation to insurer. Acknowledge referral and liaise with the treating medical practitioner about treatment.

Independent case review

Item number	Descriptor
700226	<p>Independent case review – includes assessment and report Where progress of treatment and/or rehabilitation falls outside the plan or expected course of injury management, the insurer may request an examination and report of a worker by an independent case reviewer (not the treating speech pathologist) to provide the insurer with an assessment and recommendations for ongoing treatment and prognosis.</p> <p>Prior approval is required by the insurer</p>

An independent case review is only requested by the insurer. The payment for this service includes the assessment and report.

The purpose of an independent clinical assessment is to:

- assess and make recommendations about the appropriateness and necessity of current or proposed speech pathology treatment
- propose a recommended course of speech pathology management
- make recommendations for strategic planning to progress the case. Recommendations should relate to treatment goals and steps to achieve those goals, which will assist in a safe and durable return to work
- provide a professional opinion on the worker’s prognosis where this is unclear from the current speech pathology program
- provide an opinion and/or recommendation on the other criteria as determined by the insurer.

Assistance

Contact the relevant insurer for claim related information such as:

- payment of invoices and account inquiries
- claim numbers/status
- rehabilitation status
- approval of *Provider management plans*.
