## Report types

### Comprehensive:

- written response to insurer's request for further detailed information as outlined in a progress report
- information sought may include statement of attendance, diagnosis, investigations, prognosis, clarification of treatment and return to work goals

# Specialist - Supplementary services table of costs

## Effective 1 December 2011

- may include clinical findings, summing-up and opinion helpful to insurer
- insurer questions may pertain phases of the claim e.g. establishment, ongoing management and return to work
- treating specialist opinion should be given outlining nature of the injury, capacity for work and advice on further management of case.

### Progress:

- written response to insurer's request for specific information at a specific stage of the claim e.g. information about a specific line of treatment or progress for return to work
- only information subsequent to previous reports should be provided
- A progress report provides information on the worker's functional/psychosocial progress towards recovery and/or return to work (RTW). It is appropriate to use this report where the worker is progressing toward treatment/RTW goals or where minor changes to their program are required.
- A progress report may also be appropriate where the goals of a worker's program has altered or changed substantially, such that the original goal or treatment approach is no longer appropriate. This report would be used when re-examination of the worker is not a pre-requisite for the preparation of the report and the report is based on a transcription of existing clinical records, relates to the status of the claim and comprises a clinical/professional opinion, statement or response to specific questions.

### Short:

- written responses to insurer's very limited number of questions (2 or 3) seeking further information about the worker's condition at a specific stage of the claim
